

cont

7. (Amended) The composition according to claim 1, wherein said composition comprises less than 5 wt%, relative to the total weight of the composition, of silicone oligomers.

8. (Amended) The composition according to claim 1, wherein said composition is absent any silicone oligomers.

9. (Amended) The composition according to claim 1, comprising an oligomer having ethylene oxide and butylene oxide moieties.

10. (Amended) the composition according to claim 1, comprising an oligomer having diisocyanate residues, wherein at least 50 mole% of the diisocyanates used to form the oligomer is absent a cyclic structure.

11. (Amended) The composition according to claim 1, comprising an alkoxylated aliphatic diluent.

12. (Amended) The composition according to claim 1, comprising a silane adhesion promoter.

13. (Amended) The composition according to claim 1, wherein said composition, after cure, has a secant modulus of less than 1.5 MPa.

A2

16. (Amended) The composition according to claim 14, wherein said composition comprises less than 10 wt% of monofunctional reactive diluents.

17. (Amended) The composition according to claim 14, wherein said composition, after cure, has a secant modulus of less than 5 MPa.

18. (Amended) The composition according to claim 14, wherein said composition has a viscosity of less than 3,000 cps in at least part of the temperature range 40°C-60°C.

19. (Amended) A coated optical fiber comprising a coating obtained by curing the composition according to claim 1.

See the attached Appendix showing amendments to the claims
